POISON CONTROL STATISTICS
STATISTIQUES DE LUTTE ANTIPOISON
1983

Based Mainly on the Data from the Poison Control Centres

(i.e. Telephone Calls, Emergency Dept. Treatment Admissions to Hospital and Deaths)

Fondées principalement sur les rapports des centres antipoison

(c.-à-d. appels téléphoniques, traitements aux services d'urgence, hospitalisations et décès)

FOREWORD

Definition of Poisoning as Used in These Statistics:

Not all of the cases reported to the Poison Control Program are actual poisonings in the sense that the patient developed signs or symptoms of toxicity. In the majority of cases reported to us, signs and symptoms of poisoning were not noted at the time the report was made.

Poison Control Statistics

These data must not be interpreted as being a national figure for poisonings, since these statistics do not include:

(a) reports from the vast majority of hospitals in Canada,

(b) data from physicians and paramedical personnel,

(c) data from industry,

(d) data from Statistics Canada e.g., vital statistics death registration where poisonings are principal or contributing cause of death, etc.,

(e) data from the provinces "hospital separation case records" etc.

These data are compiled only from reports received from those hospitals which each province designated as being a "Poison Control Centre". Not all designated "Poison Control Centres" report all such incidences to the same extent. Thus, some reported caseloads would be incomplete. Comparisons between provinces cannot be made using these statistics since the programs vary greatly from province to province. Some of the differences are:

(a) the number and types of hospitals reporting per province,

(b) whether telephone calls or accidental ingestions, etc., are reported or not, and

(c) more importantly, whether Coroner's cases are included or not.

AVANT-PROPOS

Définition du mot "intoxication" utilisé dans ces statistiques:

Les cas signalés au Programme de lutte antipoison ne sont pas tous des cas réels d'intoxication confirmés par des signes et des symptômes d'intoxication. Dans la majorité des cas qui nous ont été signalés, les signes et les symptômes d'intoxication n'ont pas été notés lors de la rédaction du rapport.

Statistiques de lutte antipoison

Ces données sur les intoxications ne doivent pas être interprétées comme des chiffres à l'échelon national, car ces statistiques ne comprennent pas:

(a) les rapports de la plupart des hôpitaux du Canada,

(b) les données des médecins et du personnel paramédical,

(c) les chiffres de l'industrie,

(d) les données de Statistique Canada (par exemple, les statistiques d'état civil d'enregistrement des décès pour lesquelles l'intoxication est la cause principale ou la cause contributive du décès, etc.),

(e) les données des provinces ("dossiers d'enregistrement du nombres de sorties d'hôpital", etc.).

Les données présentées sont uniquement établies à partir des rapports envoyés par les hôpitaux désignés par chaque province comme "Centre de lutte antipoison". Les "Centres de lutte antipoison" nous signalent ces cas de façon plus ou moins adéquates et, par conséquent, certaines données sont incomplètes. Ces statistiques ne peuvent pas être utilisées pour effecter des comparaisons entre les provinces, étant donné que les programmes varient considérablement d'une province à l'autre. Signalons quelques différences:

(a) le nombre et le genre d'hôpitaux qui déclarent les cas varient selon la province,

(b) les appels téléphoniques signalant une ingestion accidentelle peuvent être compris ou non compris,

(c) encore plus important, les cas examinés par le médecin-légiste peuvent être compris ou non compris.

Acknowledgement is made of the cooperation of the Provincial Poison Control Program Directors, and Directors of local Poison Control Centres in providing data to the Department and of the staff of the Federal Poison Control Program Product Accident Surveillance Section.

Nous remercions les directeurs provinciaux du Programme de lutte antipoison et, les directeurs des Centres locaux de lutte antipoison de la collaboration dont ils ont fait preuve en fournissant des données au Ministère, ainsi que le personnel de la section de Surveillance des accidents liés à un produit (Gouvernement fédéral).

protection de la santé

INSTRUCTIONS

The general format is similar to that of previous reports. A slightly modified American Hospital Formulary Service Classification System and index was used in this report (AHFSCS, page 1). Certain drugs, because of trend changes or high frequency, are presented separately.

Definition of terms:

Case - Patient referred to in each report.

Frequency - number of occurrences a product is reported. A case report may contain more than one product.

Index - a numeric code of the AHFSCS for drug classification. In this report, Index 04-88 of the AHFSCS were adopted and remainder of AHFSCS drug classifications grouped under Index 100. AHFSCS "indices" 20:04:04, 28:16 and 28:24 are identical to 150, 016 and 024 in this report. Other indices are 195 - street drugs (LSD etc.,) 490-unknown drug.

Single - only one product named in case report.

Multiple - more than one product named in each case report.

Mixed - drug(s) and non-drug(s) named in case report.

Phone call - telephone inquiry concerning an incident.

Acdt - Accident.

Suic - Suicide.

Schedule drugs - drugs listed in Food and Drug Act Schedule "C,D,E,F,G,H" and Food and Drug Regulation "F".

Control drug - schedule G of the Food and Drug Act.

Narcotic - as scheduled in the Narcotic Control Act and Narcotic Control Regulations.

INSTRUCTIONS

La présentation générale est semblable à celle des rapports précédents. Un système et un index de classification légèrement modifiés du service de formulaire des hôpitaux américains ont été utilisés dans ce rapport (AHFSCS, p. 1). Certains médicaments, en raison des changements de tendance ou d'une fréquence d'utilisation élevée, sont présentés séparément.

Définition des termes:

Cas - patient auquel on fait allusion dans chaque rapport.

Fréquence - nombre de fois où un produit est déclaré.

Index - code numérique de la AHFSCS pour la classification des médicaments. Dans le présent rapport, l'index 04-88 de la AHFSCS a été adopté, et le reste des médicaments classifiés de la AHFSCS a été groupé sous le numéro 100. Les numéros 20:04:04, 28:16 et 28:24 rejoignent, dans le présent rapport, les numéros 150, 016 et 024. Autres numéros: 195 - drogues clandestines (LSD etc.), 490 - drogues inconnues.

Produit unique - un seul produit nommé dans une déclaration de cas.

Produits multiples - plus d'un produit nommé dans chaque déclaration de cas.

Produit mélangé - médicament(s) et produit(s) non- médicamenteux nommés dans une déclaration de cas.

Appel - enquête téléphonique sur un incident.

Acdt - accident

Suic - suicide

Drogues annexées - médicaments figurant aux annexes C,D,E,F,G,H de la Loi sur les aliments et drogues, et l'annexe F des Règlements.

Drogues contrôlées - médicaments figurant à l'annexe G et de la Loi sur les aliments et drogues.

Stupéfiant - médicament figurant dans la Loi et les Règlements sur les stupéfiants.

Prescription Drug (Rx) - schedule F of the Food and Drug Regulation. Includes Vitamins A and D (over certain concentration).

Non-schedule Drugs - all other drugs not accounted for under Schedule Drugs and Narcotic Drugs.

For further statistical information, please contact:

Dr. John Jung,
Head,
Product related Accident Surveillance,
Finance Annex Building,
Tunney's Pasture,
OTTAWA, Ontario,
K1A 0L2

Drogues de prescription (Rx) - médicaments figurant à l'annexe F des Règlements sur les aliments et drogues. Comprennent les vitamines A et D au-delà d'une certaine concentration.

Drogues non annexés - tous les autres médicaments non stupéfiants ou ne figurant pas aux annexes.
